DSCI Teamed with Awardees on the Department of State's \$200 Million Global Peace Operation Initiative (GPOI) Program

Eatontown, N.J. May 1, 2007 - DSCI announced today that it will execute subcontracting agreements with awardees of the U.S. Department of State's Global Peace Operation Initiative (GPOI) Program. The five-year GPOI program, with a \$200M ceiling, is a Presidential initiative to address major gaps in international support for peace operations. These gaps include:

- A Shortage of Capable Peacekeepers;
- Limited National Capabilities For Training Peacekeeping Skills and Knowledge for Sustaining Such Peacekeeping Proficiencies;
- A Lack of Mechanisms to Help Countries Deploy to International Peace Operations and to Provide Logistics Support for their Troops in the Field; and
- A Shortage of Stability Police Units, Which Help Fill the "Security Gap" Between the Military and Traditional Police in Peace Operations.

“We are committed to peace and stability operations,” stated Steven A. De Chiaro; DSCI's Chairman, President, and CEO - “through the GPOI program, the Department of State will leverage DSCI's unique products and world-wide capabilities to support its global peacekeeping operations.”
